

Selenium – 1

Assignment – 1

Record a new session for base URL as <https://magento.com/> and then click on the icon to navigate to customer login page and then to Registration Page and automate all the fields.

Note: Leave captcha. No need to automate.

Solution:

Note: Html file uploaded to the repository

The screenshot displays the Selenium IDE web interface. At the top, there are browser tabs for 'Create New Customer Account' and two instances of 'Selenium IDE - MagentoApplicat...'. The address bar shows a file path: 'file:///C:/Selenium%20Projects/Selenium%20IDE%20-%20MagentoApplicationTest_html'. Below the browser window, the 'Project: MagentoApplicationTest*' section is visible. On the left, a sidebar shows 'Executing' and 'TestCase2*'. The main area contains a table of commands:

	Command	Target	Value
9	type	id=lastname	N R
10	click	id=email_address	
11	type	id=email_address	december18.mn@gmail.cm
12	click	id=country	
13	select	id=country	label=India

Below the table, there are input fields for 'Command', 'Target', 'Value', and 'Description'. A progress bar indicates 'Runs: 1 Failures: 0'. At the bottom, a 'Log' tab is active, showing a list of executed commands and their status (OK). The final log entry states: '*TestCase2* completed successfully'.
